Welcome To Africa Mobile

Africa Mobile is Africa's only Internet Telephony Network Operator and provides services in over 40 countries. We specialize in *Net 2 Phone*, *SIP Phones* and *Flash-Sms* among other services.

We have distinguished ourselves as leaders in reliability, efficiency and honesty. These qualities have endeared us to our customers and hence our unprecedented growth in such a short time.

We are currently envisioning having over 3 million subscribers on our network in Africa and aim to be amongst the leading Companies in Telecommunication Services. Our values are expressed in our brand through the provision of high quality and affordable Telecommunication Products.

Join our growing network today and start saving money on your telephone bills.

AFRICA MOBILE NET 2 PHONE

Africa Mobile is pleased to announce the launch of Net 2 Phone which is the cheapest call in the world. Thanks to Africa Mobile you can call from your Pc via Internet any where in the world at the lowest rates imaginable. You can get access to free internet phone calls in cases of calling from one computer to another. Computer phone calls are easy and available to anyone. The Net 2 Phone System is the cheapest in the world with calling rates as low as 0.03cts.

X-Lite is a program that can be downloaded and installed on your own Pc. It is a standalone program with all the functionality you would expect from a phone.

AFRICA MOBILE SIP PHONE SYSTEM

- Free long distance call worldwide.
- Free interoffice communications worldwide.
- Save thousands of dollars per year.
- Free office moves, adds and changes.
- Convenient, just plug it in and go.
- Easy to use. No complicated software or hardware.
- Perfect for companies with multiple locations
- Free conference calling capability
- Guaranteed to work anywhere in the world.

Africa Mobile is pleased to announce the Launching of its *Africa Mobile SIP Phone System* by using this phone you can make very cheap international calls for as little as 0.03cts and also make free calls to other AMSP users. Save money by making free long distance calls worldwide using this revolutionary, convenient and reliable SIP Phone System.

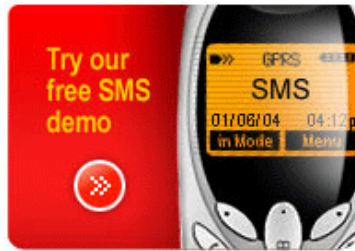

SIP (Session Imitation Protocol) is a communication system that saves you money by extending the functions of your existing office PBX to an unlimited number of extensions anywhere in the world. Simply dial an internal extension and you can speak with co-workers in other countries and towns, locations anywhere in the world, completely free of charge.

AMSP does not require any complicated software or hardware to work. It is reliable, convenient and incredibly easy to use, simply plug it into a Broadband Internet Connection and start calling for free.

AMSP communicate over the Internet and as a result do not impact on the cost of telco trunking or telephone lines, which incur a substantial monthly cost. Save money by dramatically cutting down the cost of the high voice traffic individuals such as sales and marketing staff.

AMSP Solution even provides the capability for users to transfer calls between SIP Phones and regular phones on the PBX. This capability is extending to SIP Phones regardless of where they are in the world, which provides an opportunity for business to really exploit the remote working concept without the communications tradeoff, allowing companies to dramatically reduce costs. Get your business connected today.

AFRICA MOBILE FLASH- SMS CALL

Africa Mobile provides services to all mobile users in Africa with this product . wherever you are in Africa you can contact our gateway thru a sms and or flash , After you register your mobile phone with us , you can then flash our gateway with a missed call , our gateway will call you back and ask you to enter your destination number thereafter your international call will be connected immediately
